al Sciences (Vyyezdnaya sessiya otdeleniya biologicheskikh nauk)

PERIODICAL:

Vestnik AN SSSR, 1958, Vol. 28, Nr 1, pp. 125 - 126 (USSR)

ABSTRACT:

From September 16, to September 21, 1957 the congress took place in the branch of the AN in the Moldavian SSR, which was organized together with VASKhNIL. The congress was intended to discuss the results of bidogical research in this field and to give precise information concerning the tasks to be performed in future. It was attended by 400 representatives of the branch of the AN and other scientific factory institutions, as well as by representatives of the Moscow and Leningrad Institutes. The following reports were delivered:

- 1) L. S. Matsyuk: The principal results and problems in the development of the Biological Sciences in the Moldavian SSR.
- 2) A. Ye. Kovarskiy: Innovation in the selection and the hybridization of maize.

3) Ya. I. Prints: The present stage of the phyloxera problem, ways and problems of further research.

TO AND THE PROPERTY OF THE PRO

- 4) D. D. Verderevskiy: The immunity of plants against infectious diseases and ways of their practical utilization.
- 5) N. A. Dimo: The soils of Moldavia and their main characteristic features.
- 6) N. A. Krasil'nikov: On the part played by microorganisms in plant nutrition.
- 7) P. A. Genkel: The importance of quiet in the life of plant organisms.
- 8) M. Kh. Chaylakhyan: The chemical stimulation of the growth and bloscoming of plants.
- 9) M. I. Sidorov: On the problem of the agricultural system in Moldavia.

The following sections were active: agriculture, botanics, agrochemistry, microbiology of the soil; plant physiology, plant biochemistry, selection and genetics of plants; plant structure and agriculture; protection of plants, zoology, hydrobiology and ichthyology; physiology of plants. It was recommended to extend the treatment of methodical problems connected with the investigation of

of Biological Research in the Moldavian SSR. The Tasks Out-of-Town Session of the Department of Biological Sciences

> soils, and to take measures for the further development of work tending to explain the origin of the soils of Moldavia, to find new ways of increasing the yield of soils and to struggle against erosion, etc. Furthermore, the necessity of the research of the flora was stressed, as well as of work connected with introduction and acclimatization, on the investigation of spore plants and with experimental botanics. The following suggestions were further made: to map agrochemical charts of the soils of fields with successive crops and many years of planting; the investigation of the microorganisms of various types of soil, the supplying with organic and mineral fertilizers and microelements, the increase of theoretical invesitgations on plant physiology and biochemistry; the determination of measures for the struggle against diseases and plant vermins, the increased treatment of physiological problems in order to increase the productivity of agricultural animals, and, lastly an increased introduction of scientific achievements in practice.

Coordination of Research Work in the Field of the Problem of the Dynamics of Biocomplexes (Koordinatsiya issledovaniy po

probleme dinamiki biokompleksov)

PERIODICAL:

Vestnik Akademii nauk SSSR, 1959, Nr 2, pp 105-106 (USSR)

ABSTRACT:

From October 22 to 24, 1958 a Joint Meeting of the Akademiya nauk Azerbaydzhanskoy SSR (Academy of Sciences of the Azerbaydzhanskaya SSR) and the Otdeleniye biologicheskikh nauk Akademii nauk SSSR (Department of Biological Sciences of the Academy of Sciences, USSR) was held. Problems of the further development of research work of the seasonal dynamics of plant cenogeneses, soil formation processes and soil microorganisms were discussed. The meeting was attended by representatives of the AS of the Union's Republics of Transcaucasus, Central Asia and the Baltic provinces, of biological and agricultural research and teaching institutes. A great number of botanists, soil experts, microbiologists, agroecologists, agronomists, and experts in forestry were present. The work of the meeting was performed in plenary meetings and 3 committees for the

dynamics of plant cenogeneses, soil formation processes and the dynamics of soil microflora. Moreover, the author describes in detail reports on the individual fields of research work, however, without mentioning the names of reporters. It was recommended at the conference to extend work on seasonal and perennial dynamics of natural and cultivated biocomplexes as well as to establish a center of coordination on comprehensive investigations of the dynamics of biogeocenogeneses at the Department of Biological Sciences of the AS USSR.

TITLE:

Using Molds of Aluminum "AL-9" for Cast Iron-Castings

(Lit'ye chuguna v formy iz splava AL-9)

PERIODICAL: Liteynoye Proizvodstvo, 1958, No. 4, p 24 (USSR)

ABSTRACT:

The aluminum alloy AL-9 ("GOST 2685-53" standard) was tested and proved a suitable material for molds. The authors share experience in casting cast iron into such molds. The alloy was melted in a coreless induction furnace under a flux consisting of 55% KCl and 45% NaCl, and modified by a mixture of 25% NaF, 12.5% KCl and 62.5% NaCl. It was cast, at 690-710°C, into a negative mold pre-heated to 200-220°C and kept for 15-20 sec in the mold, then air-cooled. The work surfaces of the aluminum molds (mold halves) were anodized. The article contains detailed information on the casting process (the composition of the refractory mold lining, the temperatures of mold pre-heating, and of cast iron at pouring, etc.). The castings were chilled through. The molds did not melt, corrode, or crack.

There are 4 references, 3 of which are Soviet and 1 English.
